

Enjoying Wildlife Responsibly

SIMPLE TIPS FOR ENJOYING WILDLIFE SAFELY AND APPROPRIATELY

Give Wildlife Space

Enjoy watching wildlife from a distance. Use zoom when taking photos to capture natural behaviors

Let Wildlife Find Food Naturally

Please do not feed wildlife or leave out food. The snacks we love can make our native species sick. They also cause animals to get comfortable around people, which can lead to injuries.

Leave Behind a Clean Environment

Birds can eat or get tangled in trash. Trash left at the beach can also end up in the ocean and harm seabirds.

Enjoy Natural Darkness

Light pollution can confuse seabirds flying out to sea. Make sure lights are shielded and turn off lights when not in use. You'll be able to see more of the beautiful night sky this way too.

Support Local Conservation Organizations

Hawai'i's unique plants and animals make it a special place. Donate to organizations protecting native wildlife so native species thrive for generations to come. If you have time on your trip you may also be interested in finding volunteer opportunities in your area.

The Hawai'i Wildlife Center is a nonprofit wildlife conservation organization. The Center provides medical treatment and rehabilitation to all species of native Hawaiian birds and the Hawaiian hoary bat. If you see an injured native bird or bat in need of help, please call the Hawai'i Wildlife Center (808) 884-5000.
