

HWC Sponsorship Program

We're here to help with your wildlife needs.
Support Agreements come with many benefits.

First-Responder Training

Hands-on training provided on wildlife response procedures to help expedite response, provide familiarity with protocols, and minimize the impact on any affected wildlife.

Restoration of Native Populations

Mature adult wildlife released by HWC help maintain a healthy breeding population. Take credit for all of the wildlife we release, regardless of place of origin.

Provides a Standby for Wildlife Response

The HWC operates the only purpose-built, state-of-the-art facility in Hawai'i for native wildlife response. We come with a team of wildlife professionals and have a veterinarian on staff.

Demonstrable Impact

HWC maintains thorough records of all patients and can provide quantitative information to help demonstrate measurable and quantifiable progress towards HCP goals.

Public Relations

HWC has widespread public appeal and community support. Take advantage of our patient stories and extensive photo and video archive to communicate your impact to stakeholders.

Ensures Care follows Legal Requirements

The Hawai'i Wildlife Center is fully permitted by State and Federal agencies for the rehabilitation of all native bird species and the Hawaiian Hoary Bat throughout the State of Hawai'i.

The Hawai'i Wildlife Center Sponsorship program was created to formalize a collaborative relationship between HWC and entities that may encounter native wildlife throughout the course of operations. Clients entering into the Sponsorship program sign a support agreement, which provides for the medical and rehabilitative care of native birds and bats transferred from the Sponsor to HWC, an annual wildlife first response training course, and ongoing consultation if desired. Sponsors are also able to use HWC's name, facilities and reputation in any applicable wildlife conservation and response plans as well as for media and public relations purposes relevant to wildlife response. Costs of sponsorship depend on response needs and agreement term.
